

Ecommerce Sales Dashboard

Introduction

The dataset provides a detailed record of ecommerce sales by a US-based company from 2021 to 2022. It includes essential information such as customer names, category names, product names, customer segments, customer states, delivery statuses, order dates, shipping types, order item discounts, sales per order, order quantities, and profit per order. This comprehensive dataset offers valuable insights into the company's sales performance.

Problem Statement

A US Based Ecommerce Sales Company wants us to create a Sales Dashboard Showing information of YTD Sales and generate insights for below scenarios-

- Create a KPI Banner showing YTD Sales, YTD profit, YTD Quantity sold, YTD Profit Margin.
- Find Year on Year growth for each KPI and show a YTD spark line for each measure in the KPI to understand the monthly trend for each fact.
- Find YTD Sales, PYTD sales, YoY sales growth for different customer. category. Add a trend icon for each category.
- Find YTD Sales performance by each state.
- Top 5 and Bottom 5 Products by Sales.
- YTD Sales by Region to Know best and worst performing region all over country,
- YTD Sales by Shipping Type to get the best shipping type percentage.

YTD Sales by Shipping Type

Top 5 products by YTD Sales

YTD Sales by Region

Tools Used:

- Power BI
- Power Query
- Dax Query
- Data modeling

Summary of Findings:

- Sales in 2022 are down compared to 2021, especially in the Office Supplies and Technology categories. The dashboard shows that sales in December are significantly lower than in other months. To increase sales during this time, consider offering more discounts and promotions on products.
- Profit and profit margin increased in 2022 compared to the previous year, despite a decrease in sales quantity.
- Sales of standard class shipping are very high (60.5%), while same-day shipping sales are very low (5.2%).
- Sales in the South region are much lower than in other regions, which have average sales.

Thank you
